THERMOGRAPHIC SERVICES

Infrared Thermography Surveys ♦ Airborne
Ultrasonic Surveys ♦ Electrical ♦ Mechanical
♦ Roof Inspection ♦ Heat Loss ♦ Leak
Detection ♦ Complete Predictive Maintenance

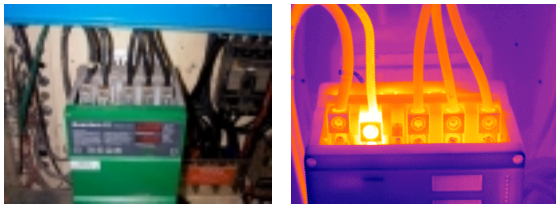

Infrared Image: Heating Electrical Connections

**Experience and Success Providing
Technology Advantages to Industry**

Infrared Thermography: electrical predictive maintenance, mechanical predictive maintenance, low-slope (flat) roof inspections and reporting, building sciences and heatloss, product research and development.

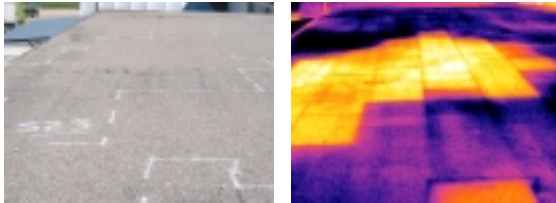

Airborne Ultrasonic Inspection: compressed air and gas system leak detection service. Reduces the cost of producing your compressed air. Steam trap inspection programs, electrical corona, arcing and tracking location.

Infrared Thermography Services

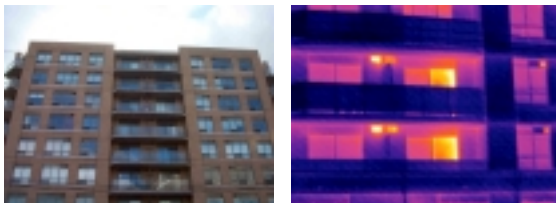

Electrical Predictive Maintenance

Electrical “hot-spot” surveys, mechanical inspections, oven and furnace refractory inspections, Industrial and residential services available. Improve reliability, stay ahead of breakdowns, improve safety. Call Us!

Low-Slope Roofing Inspection

Our roof inspection services identify, mark and report on areas of moisture infiltration into low-slope (flat) roofing materials. Why replace the entire roof when only a portion may require it? Several services available.

Building Heat Loss Inspection

Where is energy escaping your building? Our heat loss studies identify and report on all building anomaly conditions. *Great for verifying new construction, improve energy \$\$.*

Services designed to improve existing operations and save money *fast*.
The Boldstar Mission: to provide quality technology based services at rates affordable to all business types.
