Serving Toronto, Ontario and the World

Established 1998

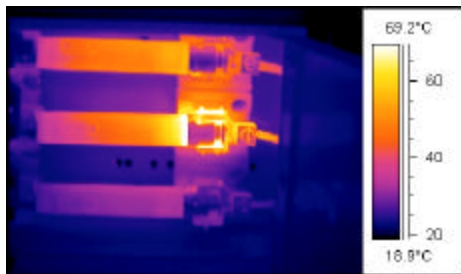

### We offer building envelope infrared inspection services

- Reporting that is accurate and meaningful.
- Pressurised building envelope VS. Normal state comparison reports.
- An important part of any due-diligence study.
- Apply energy improvement funds where they are needed the most.

Case Sample: Natatorium building envelope study – IR Inspection by Boldstar

- numerous locations of air leakage noted
- all anomaly locations documented and reported
- building management directed improvement efforts to the problem areas

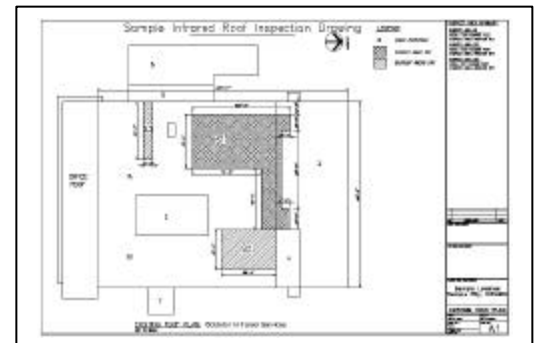

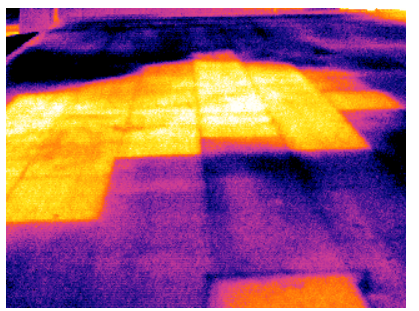

### We offer complete electrical infrared inspection services

- All of our technicians are licensed electricians.
- List of all inspected equipment included with each inspection.
- Each noted anomaly is rated in severity and repair recommendations are provided.

Case Sample: Electrical equipment scanning - IR Inspection by Boldstar

- various severity level anomalies noted, improving reliability & safety
- all problems documented and prioritised with recommendations
- problems are repaired BEFORE breakdowns or electrical fires occur

## Low-slope (Flat) Roof Infrared Inspection Services

Case Sample: Low-slope roof moisture surveys – IR Inspection by Boldstar

- moisture infiltration into the roof assembly noted, areas marked & verified
- the real condition of the roof is documented, repair costs easily determined

We provide a CAD drawing with each inspection. Dimensions of roof and noted suspect areas included
