

Radiant Floor Heating Pipe and Leak Locating Service
Underground Heat Tracing Pipe and Leak Locating Service
Artificial Ice Rink Pipe and Leak Locating Service

Introducing Boldstar Infrared Services sub-surface pipe and leak locating service. Our procedure has proven successful in finding leaks and with the location of underground pipe and cables. Our services offer advantages over other methods and are provided at rates affordable to all business types.

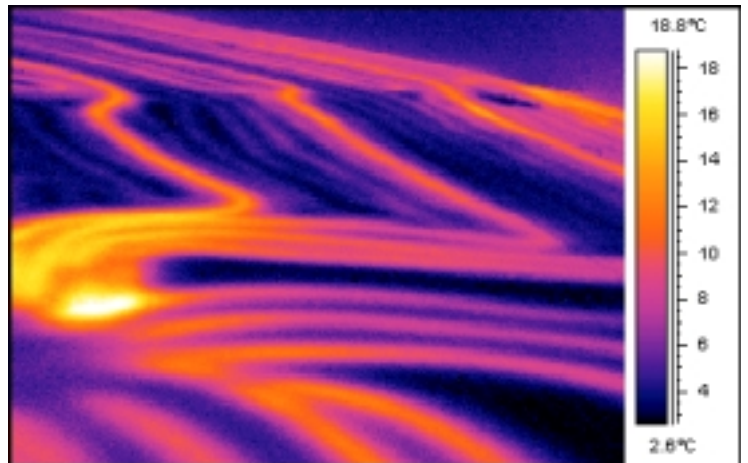

Infrared Image: thermal picture identifies leaks (at arrow)

Digital Photo of Same Location: leak at arrow

Advantages Over Other Methods

- leak locations are identified without any destructive testing.
- the procedure is completed quickly with results given "on-the-spot".
- leaks and pipe locations are actually seen and can be photographed and fully documented.
- all inspections are completed by qualified technicians using calibrated and state-of-the-art equipment.
 - Works with radiant floor heating systems, underground heat tracing and parking ramp systems, artificial ice rinks and other building heating systems.
